

Job Title: Structural Engineer
Reports to: Structures Lead and Director
Job Purpose: Our relatively new but growing office in Noida is looking for a Structural Engineer with a range of technical design expertise to work on a variety of international and local projects, ranging in both scale and scope.

Eckersley O'Callaghan is one of the most innovative engineering design firms in the world, with a global reputation cultivated through a commitment to research and creative thinking. We enjoy working with a range of materials, forms and building types across diverse sectors and project scales to deliver imaginative solutions. Our multiple award-winning collaborations with forward-thinking architects such as Foster + Partners, Zaha Hadid Architects and Heatherwick Studio, for clients that include Apple, Google, Vitsoe and Bulgari, have placed us at the forefront of design in structures and facades. Our commitment to sustainability, digital design, and continuous research and development remains at the core of our approach.

We offer a stimulating work environment with enthusiastic, intelligent, hard-working colleagues, and support personal development through training and project opportunities. Our principal office is in London, with other offices in Manchester, Paris, Milan, New York, Los Angeles, San Francisco, Delhi, Hong Kong, Shanghai and Sydney.

DESCRIPTION

We are looking for people with the following:

- A Bachelors' or master's degree in Civil / Structural Engineering
- 2+ years' proven experience in structural engineering consultancy
- Good English language communication skills and collaborative approach
- Working knowledge of Indian and BS EN standards
- Good technical skills in steel and concrete design
- An interest in digital design and FEA modeling
- Good knowledge of parametric design tools including Rhinoceros and Grasshopper is a bonus

RESPONSIBILITIES

- Report to the Structures Lead and Director
- Represent EOC at design team meetings and site meetings.
- Coordinate with architects and other engineering consultants as part of the team
- Contribute to production of internal design tools and R+D initiatives
- Maintain up to date technical knowledge
- Use analytical software effectively and interpret the outputs well
- Apply theory to practice and in a logical way
- Highlight potential problems and look for a solution
- Review own and others' work as part of quality assurance
- Create structural analysis and design reports
- Assist with preparation of fee proposals and expression of interest

PREFERRED ATTRIBUTES

- Good organisational skills and the ability to cope with a variety of tasks
- A flexible, positive approach and the ability to work as part of a team in a busy, creative atmosphere
- Excellent interpersonal skills with the ability to communicate with people of all levels

WE OFFER

- A stimulating work environment with a smart, diverse and motivated set of colleagues
- A competitive benefits package

- Volunteer and outreach opportunities
- Flexible working around core hours
- Opportunities for continuing professional development including mentoring to chartership
- An internal training programme for employees at all levels
- Opportunities for career growth
- Opportunities to take part in internal R&D activities
- Collaboration opportunities with our international offices
- World-class projects with leading architects and collaborators
